Love and how it's so pure
Dr. Martian Luther king
poem

Love it's pure and you don't want to forget about it like Martian Luther king always said. Love will always be with you whether you have it or not.

And don't forget that love will always come to you even if you know that you will never find love but you just have to believe in yourself.

And if Martian Luther king was here he would say my people even though you don't find love know you will sometime.

Like Martian Luther king he had a wife and a little five year old. Even

though they burned down Martin Luther King's house down does not mean they were all the same.

And when Martin Luther King was young he could play with the little white boys but the white boys could not play with Martin

And Martin's parents they were upset because Martin loved playing with the little white boys.

And anyway love is pure and you can always find love no matter what you look like or what color you are and like I said you can find love in any time period like when you're old young teen adult any time so don't be upset about it if you can't find love.
